

ABSTRACT OF THE DISCLOSURE

B1
A topical composition containing an aqueous gel which contains a hydrophilic gelling material, wherein the gel has at least one of the following properties: an initial viscosity V_0 ranging from 3000 to 50,000 Pa.s, wherein the initial viscosity is stable up to a shear strain C_1 , a viscosity V_2 after shear at a strain C_2 , wherein a ratio of V_0/V_2 is greater than or equal to 1000, and a difference of C_2-C_1 is less than or equal to 100 Pa.
